Lancer APK Installation Guide (Android)

Prepared: February 14, 2026

App: Lancer   Package: com.jameshub.jobs   Version: 1.0.0

Build: Internal preview (APK)

DOWNLOAD LINK

Download APK

If the link doesn't open, copy and paste this URL into your browser: https://drive.google.com/file/d/1aGStaCu5Ru6iWAS5vVftYQdeBgrkLTLs/view?usp=drive_link

---

Before you install

- Use a stable internet connection.
- Make sure you have at least 200 MB of free storage.
- If you already have an older Lancer build installed, keep it—this APK should update it (same signing key). If install fails, uninstall the old app and retry.
- Only install the APK from the official link above.

Install steps

1. Open the Google Drive link and download the APK file.
2. If Android blocks the install, tap **Settings** and enable **Allow from this source** for Chrome/Drive, then go back.
3. Tap **Install** and wait for it to finish.
4. Tap **Open** to launch Lancer.

Enable "Install unknown apps" (if prompted)

- Go to **Settings → Apps → Special access → Install unknown apps**.
- Select Chrome or Drive, then enable **Allow from this source**.

Updates

When a new APK is shared, download and install it the same way. If it refuses to install due to a signature mismatch, uninstall the old version first and then install the new APK.

Troubleshooting

- **"App not installed"**: Check free space, then uninstall any old build and retry.
- **"Parse error"**: Re-download the APK; the file may be incomplete.
- **Play Protect warning**: Tap **Install anyway** if you trust the source.
